```python
#Temperature Convertor from Celsius to
Fahrenheit
Celsius = int(input("Enter the temperature in
Degree Celsius: "))
Fahrenheit = (Celsius*9/5)+32
print("The converted temperature is",
Fahrenheit)
```

C:\Users\nitin\AppData\Local\Programs\Python\Python39-32\python.exe C:/Users/nitin/PycharmProjects/untitled/Tut11.py

Enter the temperature in Degree Celsius: 35

The converted temperature is 95.0

Process finished with exit code 0
